

## TWO CHERRIES CARVING TOOLS

### Carving Tools

TWO CHERRIES CARVING TOOLS, in production for over one hundred years, are available in nearly 750 different sizes and shapes. There are no carving chisels made anywhere in the world today that surpass the quality of these German tools. These are professional, long model tools, fine polished inside, with a blade length (without tang) of 125mm.

#### Numbering

Ordering carving tools can be confusing, so here is an explanation of the numbering system for our full size professional tools. All our tools have a seven digit number (XXX-XXXX). The first three digits for all professional carving tools is 505 (505-XXXX). The next two digits indicate the "sweep" of the tool (505-08XX). The last two digits indicate the width of the cutting edge (505-0812). The preceding example (505-0812) indicates a professional Two Cheries #8-sweep straight gouge with a cutting edge of 12mm. The (\*) or (\*\*) indicates tools found in one of our two sets.

#### Handles

All tools come standard with a fine quality octagon handle. In addition, all tools of 25mm or larger have double-hooped handles for added strength.

### Professional Tool Sets

Twelve piece set is the start-up set, while the six piece set can be used as a beginning set, but is more useful as an add-on of larger tools to the twelve piece set. With both sets, almost any project can be attempted, and special tools purchased as needed.

Small Carving Tools

These smaller *Two Cherries* carving tools are the same quality as the larger professional tools shown on pages 42-44, but fill the need for the occasional carver, and the carver doing smaller work. These are professional quality, smaller tools, polished all around.

All of these tools come with an octagonal shaped handle that you will find easy to work with.
